

Rating categories for products tested under the MarketWatch project

Red: Claim or limit not met in technical testing. No response from manufacturer or remedy actions not accepted.

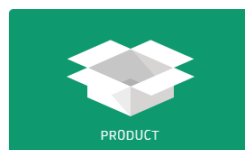

Orange: Claim or limit not met in technical testing. Remedy actions partially accepted.

Yellow: Claim or limit not met in technical testing. Remedy actions accepted.

Light green: No failure in technical testing; results do not fully meet claims/limits but are within tolerance limits, or there is a documentation error.

Dark green: Product measured fully in line with claims/limits.

Grey: Inconclusive. Product found to be placed on market before regulation applied.
